React Node JS File Upload - Do It Right From the Start

In this post we will look on React and NodeJS file upload and how to bind them properly.

Really often we need to upload some files from our React application and we want to upload them to our server which is typically build with NodeJS because we want to store these files on the backend. The question is how to do that efficiently.

Initial project

Here I already prepared for us 2 folders: backend and frontend.

```js
// backend/src/index.JS
const express = require('express')
const cors = require('cors')

const app = express()
```
